

Woodworking Adventures for Kids

A 6-week program to teach woodworking to our kids

Age Group: 9 to 13 years old

Program Overview:

Woodworking Adventures for Kids is a comprehensive and immersive program carefully crafted to introduce children aged 9 to 13 to the captivating world of woodworking.

Over the course of six weeks, children will build a strong foundation in woodworking skills and complete exciting projects.

Our Objectives:

- **Ignite Creativity:** We believe in nurturing the creative spark within every child. Woodworking is not just about crafting wood; it's about turning imagination into tangible creations.
- **Cultivate Confidence:** As kids embark on woodworking journeys, they gain confidence in their abilities, learning that they can overcome challenges and turn raw materials into something meaningful.
- **Develop Skills:** Woodworking offers a unique blend of practical and artistic skill development. Children will learn to measure precisely, cut accurately, and bring their visions to life using hand tools.
- **Encourage Safety:** Safety is paramount in our program. We prioritize teaching children safe practices from day one, ensuring that they feel secure while exploring this exciting craft.
- **Foster a Sense of Achievement:** Each week, as kids work on the construction of the project, they experience the satisfaction of creating something with their own hands. This sense of achievement boosts self-esteem.

Program

Week 1: Woodworking Fundamentals (1 hr 45 mins)

- Introduction to woodworking tools and safety measures.
- Explore different types of wood and their characteristics.
